

The Flying Canoe

INFORMATION SHEET

RAG & BONE PUPPET THEATRE is looking forward to presenting *The Flying Canoe* for your school. Here's some information about the show, and what we need from you.

TIMES

Time for set up:	1 hour
Length of show:	50 minutes
Question period:	10 minutes
Take down time:	1 hour

We need use of the performance area for about three hours. Please rearrange any activities scheduled for that time, and have the space cleared for our arrival.

SEATING ARRANGEMENT

Our set will extend 24 feet across, and is 16 feet deep. We'll help the teachers to seat their students. The students should sit cross-legged on the floor, in order of age. This is easiest to accomplish if the students arrive in order of age, youngest to eldest. The youngest group could arrive about 5 minutes prior to the performance time.

CHAIRS

Although children will be seated on the floor, we'll set chairs along the sides to mark out their area; teachers can use these chairs to sit beside their classes. We also need three chairs to use on the set.

NOISES

Please turn off all bells, fans, and air conditioners for the performance.

ACCESS TO PERFORMANCE AREA

We need to back our van up to the door which gives the closest access to the performance area. Please arrange to have gates and doors unlocked, and to keep a parking space free for us. If there is no easy access to the performance area, we'd appreciate it if three or four people could help us to unload and load our equipment.
