◀ IT EPITOMIZES THE CLASSIC RACING BICYCLE WITH ITS STEEP ANGLES AND FULLY LUGGED DIAMOND-FRAME CONSTRUCTION. WE HAVE SIMPLY DEFINED IT IN STATE-OF-THE-ART TERMS: BIAS-PLY ALLOY-CORE CARBON FIBER TUBES; PRECISION INVESTMENT-CAST ALLOY LUGS; APA BONDING. THEN, FITTINGLY, WE COMMEMORATE OUR HUNDRED YEARS OF TECHNICAL ACHIEVEMENT WITH DROP-DEAD GOOD LOOKS; GLOSSY, NATURAL BLACK FINISH; 14K GOLD PLATING; BROOKS LEATHER SADDLE; HAND-SEWN LEATHER HANDLE BAR GRIPS. BUT ALL THAT'S GOLD IS NOT GLITTER. THE TEAM CENTURY IS RACE-READY WITH 8-SPEED DURA-ACE, BLADED SPOKES AND A CARBON FIBER FORK DESIGNED TO HOLD HIGH-SPEED TURNS. YET WE DOUBT IT WILL EVER GET THE CHANCE TO PROVE IT.

IT'S FITTING TO COMMEMORATE OUR FIRST 100 YEARS PURSUING THE ULTIMATE BICYCLE WITH THE MOUNTAIN CENTURY. ATBs REPRESENT THE NEWEST FORM OF SELF EXPRESSION IN CYCLING, SO OUR MOUNTAIN CENTURY REPRESENTS AN UP-TO-THE-MOMENT COMBINATION OF TECHNIQUE AND TECHNOLOGY. HERE, AESTHETICS UNDERSCORE OUR EMPHASIS ON THE HUMAN ASPECTS OF BICYCLE DESIGN, BUT CENTURY'S TECHNOLOGY NEARLY OUTSHINES ITS 14K GOLD LUGS. THE BIAS-PLY ALLOY-CORE CARBON FIBER TUBING, APA BONDING AND ONE-PIECE CARBON FIBER BAR AND STEM MERELY SCRATCH THE SURFACE. BUT THEN, YOU REALLY WOULDN'T WANT TO SCRATCH THE SURFACE OF THIS LIMITED-EDITION, REGISTERED AND AUTOGRAPHED BEAUTY, WOULD YOU?

Century

TOKYO IN 1889 HAD BARELY SEEN A BICYCLE BEFORE—AND HERE WAS AN AMERICAN PUSHING A BROKEN ONE THROUGH THE GINZA, CROWDED AS ALWAYS WITH MESSENGERS, CARTS, RICKSHAWS, PEDDLERS AND WATER CARRIERS. AS THE BICYCLE PASSED A SMALL FACTORY, THE OWNER, EISUKE MIYATA, STEPPED INTO THE STREET. THE AMERICAN STOPPED. COULD THEY...?

ONE YEAR LATER, THE MIYATA RIFLE FACTORY'S REPUTATION FOR REPAIRING FOREIGN BICYCLES HAD CREATED A "SIDELINE" BIG ENOUGH TO REQUIRE A MOVE INTO LARGER QUARTERS, WHERE MR. MIYATA PROCEEDED TO DESIGN AND PRODUCE JAPAN'S FIRST BICYCLE. AND WHERE THE NEW COMPANY'S COMMITMENT TO THE FUTURE OF WHEELED VEHICLES LED, NOT JUST TO REMARKABLE BREAKTHROUGHS IN BICYCLE MANUFACTURE, BUT TO PIONEERING DEVELOPMENT AND PRODUCTION OF AUTOMOBILES AND MOTORCYCLES AS WELL.

THE PURSUIT OF EXCELLENCE HAS DISTINGUISHED THE MIYATA BICYCLE COMPANY THROUGHOUT ITS HISTORY. FROM THE 1890S SOLID-TIRE BICYCLE CREATED FOR THE CROWN PRINCE OF JAPAN, THROUGH THE BONDED TITANIUM BICYCLES CREATED FOR THE CHAMPIONS OF THE 1990s, THE MIYATA MISSION HAS BEEN A SINGULAR ONE: *TO DEDICATE HUMAN RESOURCES TO THE PERFECTION OF BICYCLES THAT SERVE THE HUMAN RIDER.* IN THE SPIRIT OF THAT PHILOSOPHY, EVERY MIYATA BICYCLE IS COVERED BY A LIFETIME GUARANTEE. AND THOUGH MANY OF THE WORLD'S BICYCLE MANUFACTURERS CLAIM TO BE ON THE CUTTING EDGE OF TECHNOLOGY, NOT ONE HAS DARED TO MATCH THE MIYATA GUARANTEE.

TODAY, ONE HUNDRED YEARS AFTER THE FIRST BICYCLE WAS WHEELED OUT THE RIFLE FACTORY DOOR, THE MIYATA REPUTATION IS ONE OF JAPAN'S MOST DISTINGUISHED EXPORTS. AND IT IS ESPECIALLY FITTING THAT AMERICANS, WHO LED EISUKE MIYATA TO HIS DREAM, ARE THE BENEFICIARIES OF BICYCLES THAT MATCH HIS VISION.

STB: THE WORLD'S FINEST CHROMOLY BICYCLES.

THE ONGOING PROCESS OF BUILDING THE WORLD'S MOST RELIABLE PRODUCTION BICYCLES LED MIYATA TO THE DEVELOPMENT OF STB TUBING. AS OUR EARLY RESEARCH ON FRAME STRESS REVEALED HOW VIBRATION AND SHOCK TEAR FRAMES APART, WE WERE LEARNING HOW TO KEEP THEM TOGETHER. WE KNEW MAKING THE TUBES THICKER AT HIGH STRESS POINTS WOULD CREATE A STRONGER FRAME—ALSO A HEAVIER ONE. BUT OUR TESTS SHOWED US WHERE FRAMES RECEIVE VERY LITTLE STRESS AS WELL. WE COULD SAVE THE WEIGHT OF REINFORCEMENT BY REDUCING TUBE THICKNESSES AT LOW STRESS POINTS. WE WERE "DOUBLE BUTTING" OUR FRAMES—MAKING THE TUBES THICKER ON THE ENDS WHERE THEY BUTT TOGETHER, THIN IN THE MIDDLE WHERE THERE WAS VERY LITTLE STRESS. BUT THE ENDS DON'T RECEIVE EQUAL STRESS, SO THEY DON'T NEED TO BE THE SAME THICKNESS. A MORE REFINED SOLUTION WAS "TRIPLE BUTTING." THREE THICKNESSES: A DIFFERENT THICKNESS AT EACH END, ONE THINNER IN THE MIDDLE. EACH OF THE THREE MAIN TUBES IN THE FRAME, DEPENDING ON ITS PRECISE STRESS LOAD, COULD BE BUTTED IN DIFFERENT RELATIONSHIPS. TUBE MANUFACTURERS COULDN'T (OR AT THAT TIME WOULDN'T) PROVIDE THAT KIND OF ACCURACY, SO IN 1981 WE BUILT OUR OWN TUBING MILL. WE WERE, AND ARE, THE ONLY MANUFACTURER TO DRAW OUR OWN TUBES. AND AS A RESULT, THE FIRST TO TRIPLE-BUTT OUR FRAMES. ADDITIONAL RESEARCH REVEALED THAT THE MOST DESTRUCTIVE FORM OF STRESS TO THE FRAME WAS NOT VIBRATION OR VERTICAL

LOADING (HITTING A BUMP) BUT TORSION STRESS. STRESS CREATED WHEN A 175 LB. CYCLIST GETS OFF THE SADDLE AND HAMMERS FOR THE LINE—OR WHEN A RECREATIONAL RIDER WANTS TO GET ACROSS A BUSY HIGHWAY QUICKLY. THE TWISTING, SIDE-TO-SIDE MOTION OF HARD PEDALING CAN TEAR A FRAME APART. OUR ANSWER WAS TO MINIMIZE THE TUBE'S ABILITY TO TWIST BY ADDING RIDGES OF STEEL TO THE INTERIOR WALL RUNNING IN THE SAME DIRECTION AS THE STRESS LOAD. THE RIDGES OF STEEL ARE CALLED SPLINES, AND THEY ARE SO EFFECTIVE IN RESISTING TORSION STRESS, THAT THE TUBE'S THICKNESS COULD BE REDUCED EVEN MORE. ALLOWING US TO TAKE ADDITIONAL WEIGHT OUT OF THE FRAME. SPLINED, TRIPLE-BUTTED TUBING—STB—IS LIGHT, STIFF, STRONG AND MATCHED EXACTLY TO THE DYNAMICS OF THE FRAME. AND IT'S A MIYATA EXCLUSIVE.

SPLINES KEEP TORSION FROM TEARING BOTTOM BRACKET APART

APA. ALUMINUM-PRESSURIZED-ADHESIVE BONDING.

WHEN YOU ALREADY BUILD THE WORLD'S FINEST STEEL FRAMES, WHY SEEK ALTERNATIVES? BECAUSE BUILDING THE FINEST STEEL FRAME WAS NEVER OUR GOAL—BUILDING THE FINEST BICYCLE IS. THE MAJOR PROBLEM WITH OPTIMAL BICYCLE PERFORMANCE IS THE MOTOR. ITS POWER SOURCE IS THE CYCLIST, SO TO IMPROVE PERFORMANCE WE HAVE TO MINIMIZE FACTORS THAT WEAR OUT THE ENGINE. CYCLISTS EXPEND ENERGY TWO WAYS: OVERCOMING RESISTANCE AND ABSORBING VIBRATION. MATERIALS THAT REDUCE THOSE FACTORS REDUCE ENERGY LOSS. ALUMINUM IS AN EXCELLENT CHOICE. ALUMINUM FRAMES ARE 20% LIGHTER AND 12% STIFFER THAN STEEL FRAMES. EXTRA STIFFNESS IMPROVES THE CYCLIST'S EFFICIENCY—POWER THAT IS OTHERWISE LOST IN A SOGGY FRAME WILL BE TRANSFERRED DIRECTLY TO THE WHEELS. LESS WEIGHT TRANSLATES INTO LESS RESISTANCE—A GIVEN AMOUNT OF ENERGY WILL PROPEL A LIGHT BICYCLE EITHER FARTHER OR FASTER THAN A HEAVY ONE. THE OTHER MAJOR ADVANTAGE TO ALUMINUM IS THE COMFORT OF ITS RIDE.

VIBRATION AND ROAD SHOCK ROB THE CYCLIST OF ENERGY, JUST AS FOOTSTRIKE FATIGUES A RUNNER OR REPEATED JABBING WEARS DOWN A FIGHTER. ALUMINUM TUBING DAMPENS SHOCK 50% FASTER THAN STEEL, SO MOST OF IT NEVER REACHES THE RIDER. WHY HAVEN'T WE BEEN MAKING BICYCLES OUT OF ALUMINUM ALL ALONG? UNTIL THE DEVELOPMENT OF AEROSPACE ADHESIVES, THE ONLY WAY TO BUILD AN ALUMINUM

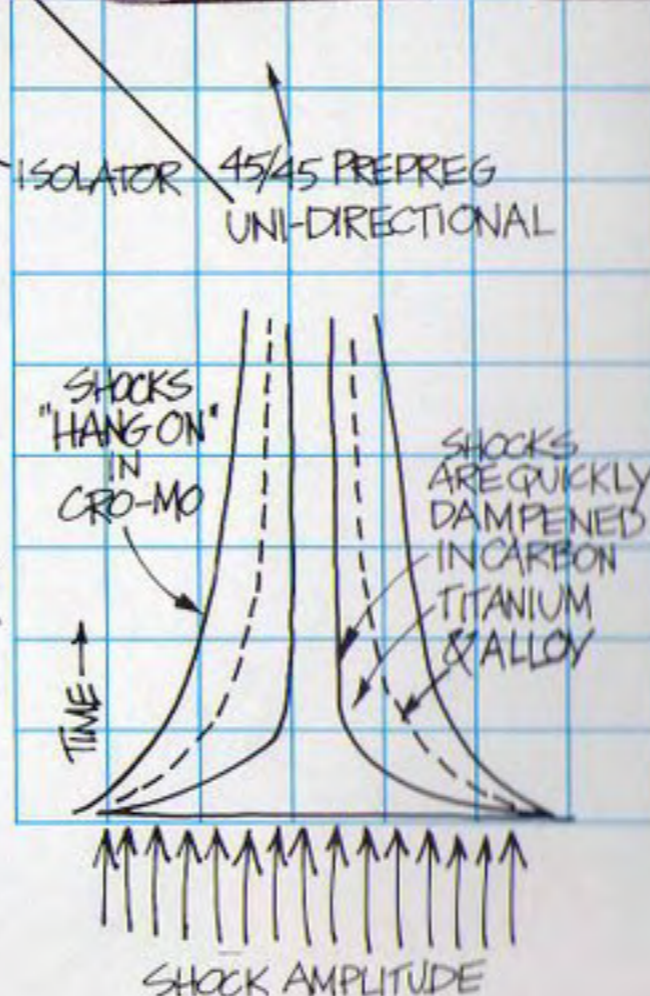

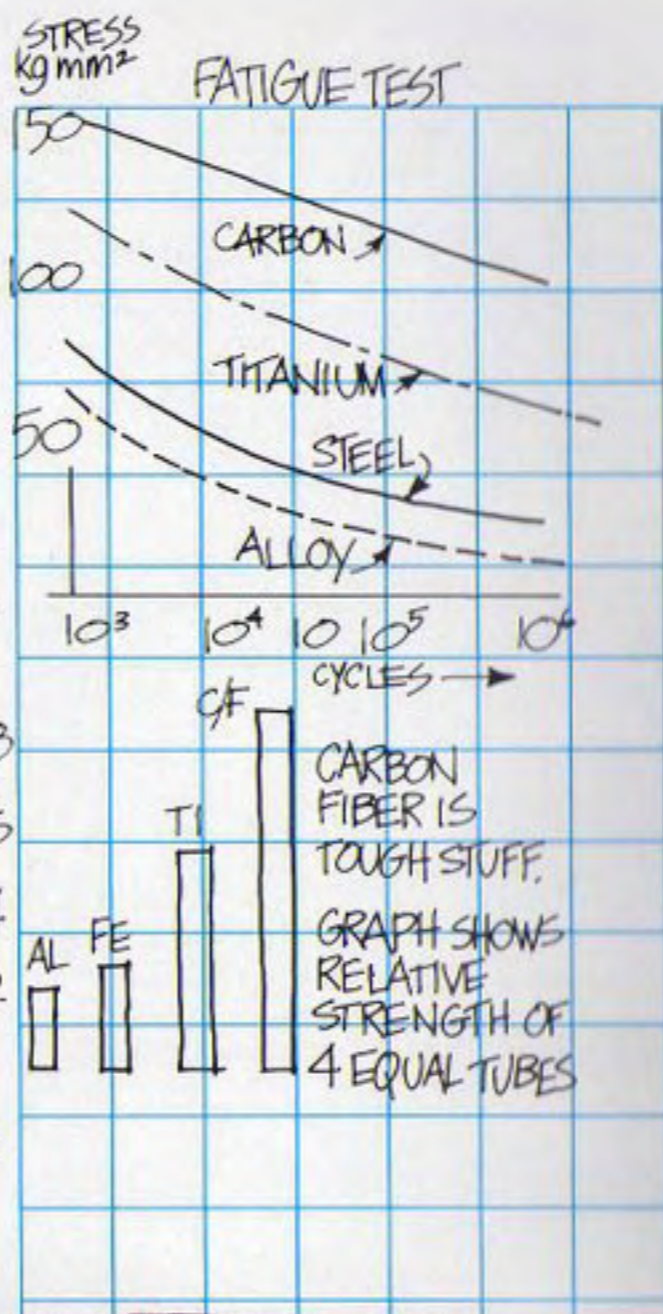

BICYCLE WAS TO WELD IT. THAT RESULTED IN A LOSS OF STRENGTH AND ALIGNMENT THAT WAS SIMPLY UNACCEPTABLE. UNTIL MIYATA DEVELOPED ALUMINUM-PRESSURIZED-ADHESIVE BONDING. IT STARTS BY MAKING PRECISION-CAST, LIGHT-ALLOY LUGS TO TOLERANCES OF 3/100MM. THEN A SPECIAL ADHESIVE IS APPLIED TO THE LUG AND TUBE, WHICH ARE HELD UNDER PRESSURE WHILE THE JOINT IS HEATED TO 150° CENTIGRADE. HEAT, ACTING AS THE CATALYST, CREATES A CHEMICAL REACTION IN THE JOINT, PRODUCING A PERMANENT FRICTION COEFFICIENT OF 300KGS/CM.² THAT MEANS THE TUBE OR THE LUG WILL BREAK BEFORE THE GLUE-LINE WILL. THIS METHOD OF BONDING HAS PROVEN SO SUPERIOR WE NOW BOND OUR CARBON FIBER AND TITANIUM BICYCLES WITH THIS PROCESS.

CARBON-TECH. THE NEXT 100 YEARS.

CARBON FIBER. STRONGER THAN STEEL. LIGHTER THAN ALUMINUM. BETTER THAN ANY OTHER FRAME MATERIAL FOR SHOCK ABSORPTION. AND IN THE HANDS OF THE FINEST PRODUCTION FRAME MAKERS IN THE WORLD, STUFF YOU'D EXPECT TO RESULT IN PRETTY SPECTACULAR BICYCLES. MIYATA'S CARBON-TECH MODELS WILL NOT DISAPPOINT YOU. THEY'LL GIVE YOU A RIDE UNLIKE ANYTHING YOU'VE EVER EXPERIENCED. TO APPRECIATE JUST HOW WELL MIYATA HAS ADAPTED THIS SPACE-AGE MATERIAL TO A HUNDRED-YEAR TRADITION OF FRAME BUILDING, YOU SHOULD KNOW SOMETHING ABOUT CARBON FIBER. ALL ORGANIC MATERIAL CONTAINS CARBON. A CARBON FIBER IS AN ORGANIC THREAD REDUCED TO PURE CARBON BY COOKING IT IN A NON-OXYGEN ENVIRONMENT. THE THREAD EMERGES FROM THE OVEN, A THIN ROD OF CARBON, WITH THE BASIC PROPERTIES OF UNCOOKED LINGUINI. HARD. VERY STRONG WHEN YOU PULL ON THE ENDS, BUT EASY TO BREAK IF YOU SNAP IT IN THE MIDDLE. THERE IS A RECIPE TO OVERCOME THAT OBVIOUS DISADVANTAGE: BY IMPREGNATING THE RODS IN RESIN "BLANKETS." MANY LAYERS OF THE BLANKETS ARE THEN FORMED INTO TUBES. BY VARYING THE ANGLES AND NUMBERS OF LAYERS, THE TUBES CAN BE FINE-TUNED TO MATCH FRAME STRESSES JUST LIKE OUR STB TUBING.

ANOTHER REFINEMENT WE MADE IN OUR TUBE CONSTRUCTION WAS TO WRAP THE BLANKETS AROUND A THIN CORE OF TEMPERED ALUMINUM TUBING. THIS TECHNIQUE SOLVED A NUMBER OF PROBLEMS WE FACED TRYING TO PERMANENTLY BOND CARBON FIBER TUBES TO ALUMINUM LUGS. THE CORE CREATES AN ALUMINUM TO ALUMINUM BOND THAT REMAINS STABLE DURING TEMPERATURE CHANGES. BOTH PARTS EXPAND AND CONTRACT IDENTICALLY. THE ALUMINUM CAN BE MORE EFFECTIVELY ISOLATED FROM THE CARBON FIBER, THUS AVOIDING THE CORROSIVE BATTERY EFFECT THAT OCCURS WHEN CARBON AND ALUMINUM COME INTO CONTACT. AND THE INNER CORE REINFORCES THE TUBE'S LATERAL STRENGTH. THE BENEFITS TO THE CYCLIST ARE BICYCLES THAT ARE STRONG AND DEPENDABLE, WITH FRAMES 20% STIFFER THAN THE STIFFEST CHROMOLY FRAMES, YET 40% LIGHTER; BICYCLES THAT FILTER OUT HARSH PAVEMENT WHILE STILL COMMUNICATING ESSENTIAL ROAD INFORMATION TO THE RIDER; BICYCLES THAT ABSORB VIBRATIONS AND SHOCKS TO CONSERVE THE CYCLIST'S ENERGY. BICYCLES THAT ARE RELIABLE, LIGHT ULTRA-PERFORMERS FOR THE NEXT 100 YEARS.

TITANIUM. THE ULTIMATE RIDE.

TITANIUM TUBING, ONCE AVAILABLE ONLY TO PUMP HYDRAULIC FLUID THROUGH SUPERSONIC CONTROL SURFACES OR TO DISTRIBUTE CORROSIVE LIQUIDS THROUGH CHEMICAL COMPLEXES IS NOW AVAILABLE TO PUMP ADRENALIN THROUGH CYCLISTS. TITANIUM MAY BE THE ULTIMATE MATERIAL FOR A BICYCLE FRAME. IT DAMPENS SHOCK AND ABSORBS VIBRATIONS AS EFFECTIVELY AS CARBON FIBER IT'S LIGHTER THAN STEEL, STIFFER THAN ALUMINUM AND IMPERVIOUS TO SWEAT, ROAD SALT, OXIDATION AND ACID RAIN—EVEN WITHOUT PAINT. THAT TRANSLATES INTO A COMFORTABLE-TO-RIDE BICYCLE, EFFICIENTLY STIFF, LIGHT AND RESPONSIVE AND ONE THAT WILL LOOK GOOD FOR AS LONG AS YOU OWN IT. WHAT MORE COULD YOU WANT. IF YOUR OBJECTION IS PRICE, WE HAVE LOWERED THAT OBSTACLE AS WELL WITH APA BONDING; A PROCESS SUPERIOR TO WELDING TITANIUM FOR THREE REASONS—STRENGTH, ALIGNMENT AND COST. DURING WELDING, TITANIUM IS EXTREMELY SUSCEPTIBLE TO CONTAMINATION. MINUTE AMOUNTS OF OXYGEN CAN BE ABSORBED THAT WILL EMBRITTLE THE TITANIUM, CAUSING IT TO SHATTER UNDER STRESS. WELDING TEMPERATURES CAN ALSO WARP TUBES, CREATING ALIGNMENT PROBLEMS THAT CAN ONLY BE SOLVED BY COLD SETTING. THAT'S A EUPHEMISM FOR BENDING THE FRAME STRAIGHT AFTER IT'S BEEN ASSEMBLED. AND, SINCE TITANIUM IS DIFFICULT TO PERMANENTLY BEND, WE DOUBT COLD SETTING IS A PROCEDURE BENEFICIAL TO THE FRAME'S INTEGRITY. NOW, THERE ARE WAYS AROUND THESE PROBLEMS.

TITANIUM FRAMES PROPERLY WELDED WILL BE LIGHT AND STRONG. BUT WE ALSO KNOW IT REQUIRES TECHNIQUES THAT PUT THE FRAME'S PRICE IN AN ATMOSPHERE AS RARIFIED AS THAT REQUIRED FOR THE WELDING PROCESS ITSELF. ROUGHLY, A HUNDRED DOLLARS FOR EACH OUNCE YOU SAVE OVER A LUGGED FRAME—FOR A MAXIMUM REDUCTION EQUAL TO THE DIFFERENCE BETWEEN YOUR WATER BOTTLE BEING FULL AND HALF-EMPTY. WITH OUR TITANIUM FRAME'S ALIGNMENT EQUAL TO THE FINEST CHROMOLY FRAMES, WITH RIDE CHARACTERISTICS IDENTICAL TO OTHER TITANIUM BICYCLES, WITH NO POSSIBILITY OF FAILURE DUE TO BRITTLE METAL, AND WITH OUR LIFETIME GUARANTEE, WE RECOMMEND THE HALF-EMPTY WATER BOTTLE TO REDUCE WEIGHT. AND TO KEEP YOUR POCKETS HALF-FULL.

DO NOT, WE REPEAT, DO NOT TEST RIDE THE TI-6000 UNLESS YOU ARE PREPARED TO BUY IT. TITANIUM WILL SPOIL YOU FOR EVERY OTHER BICYCLE, AND THIS BICYCLE WILL SPOIL YOU FOR EVERY OTHER TITANIUM. APA BONDING PRESERVES FRAME STRENGTH AND ALIGNMENT. SPECIAL ALLOY TITANIUM IN THE MAIN TUBES ELIMINATES ROAD SHOCK AS EFFECTIVELY AS CARBON FIBER—YET IT'S STIFFER THAN ALUMINUM (60%) AND LIGHTER THAN STEEL (40%). IN THE REAR TRIANGLE WE'VE OPTED FOR ALUMINUM TO PRESERVE THE FRAME'S LIGHTNESS WHILE PRESERVING THE CYCLIST'S BUDGET. COMBINED WITH 7-SPEED ULTEGRA AND CLIPLESS PEDALS, THE TI-6000 DELIVERS ALL THE PERFORMANCE OF OTHER TITANIUM BICYCLES VERY AFFORDABLY.

ENTER THE WORLD OF HYBRID BICYCLES. PRODUCTS WITH THE FUZZIEST MARKET POSITIONING SINCE THE EDSEL; HOWEVER, THIS TIME THE CONFUSION IS INTENTIONAL. ARE THEY LIGHTWEIGHT MOUNTAIN BIKES OR REALLY EXTRA-TOUGH ROAD BIKES? NOT EVEN YOUR HAIRDRESSER KNOWS. BUT A LOT OF CYCLISTS KNEW THEY COULD NEVER USE ALL THE MUSCLE OF AN ATB, AND WOULDN'T ACCEPT THE UNCOMFORTABLE, BENT-OVER RIDE OF A LIGHTWEIGHT. CYCLOCROSS RACERS ARE THE EXCEPTION, AND SUFFER THEIR OWN PECULIAR DEMENTIA.

CrossBicycles

THE CROSS BICYCLE (FOR CROSS-OVER) ANSWERED THE NEED FOR AN EFFICIENT LIGHTWEIGHT THAT COULD SURVIVE A POTHOLED CITY STREET, PROVIDE UPRIGHT COMFORT AND CONTROL AND NOT COME WITH A TRAILER HITCH AND FULL-TIME 4-WHEEL DRIVE. ALAS, OUR FIRST OFFERING OF THE CROSS SERIES WAS FAR TOO TIMID. WE APOLOGIZE. FOR THOSE WHO HAVE PATIENTLY WAITED, REJOICE. THREE NEW MODELS ARE AVAILABLE IN SUFFICIENT QUANTITIES TO CREATE AN IDENTITY CRISIS OF EPIDEMIC PROPORTION.

alumicross

IF YOU WANTED TO QUICKLY GO FROM POINT A TO POINT B OVER TERRAIN THAT INCLUDES HIGH-SPEED HARD SURFACE, MUD PITS AND FALLEN TREES, THEN THIS IS THE BICYCLE YOU WANT TO RIDE, SLIDE, DRAFT AND DRAG TO THE FINISH LINE. IT'S A PECULIAR FORM OF INSANITY CALLED CYCLOCROSS AND IT TAKES A SPECIAL BICYCLE THAT CAN GO FAST LIKE A RACER AND STAY TOGETHER LIKE AN ATB. ALUMICROSS IS SPECIAL. BUILT WITH 6000 SERIES ALUMINUM, IT'S APA BONDED TO SURVIVE A LIFETIME OF ABUSE. BAR-END SHIFTERS GIVE YOU UP-TOP CONTROL ON ROUGH TERRAIN; SPREAD BARS THOUGHTFULLY KEEP THEM AWAY FROM YOUR KNEES. EVERY DETAIL HAS BEEN DESIGNED TO GIVE YOU A COMPETITIVE EDGE.

LAST YEAR WHEN WE INTRODUCED A NEW LITE ATB (OR WAS IT A HEAVY-DUTY ROAD BIKE?) WE DESCRIBED IT AS A DOUBLE DOSE OF FUN WITH A TRIPLE-BUTTED FRAME AND A TRIPLE CHAINRING...TA DAA—THE TRIPLECROSS! WELL, IT'S BACK AND THAT DESCRIPTION STILL HOLDS. BUT WE CORRECTED THE ONLY COMPLAINT WE EVER RECEIVED: WE *REALLY* HAVE THEM. LOTS OF THEM—HONEST. THEY'RE EVEN BETTER THAN THE ONES WE DIDN'T HAVE LAST YEAR. TRIPLECROSS NOW SPORTS SHIMANO 300LX-STI WITH 21 GEARS AND HYPER/SUPERGLIDE TO MAKE IT ALL SMOOTHLY EFFICIENT. THIS PICTURE IS WRONG. BEFORE YOU READ MORE, ROTATE THIS PAGE 90° COUNTER CLOCKWISE (THAT'S TO THE LEFT). OK... TRAILRUNNER IS MADE OF SLIGHTLY OVERSIZE ALUMINUM TUBING APA BONDED WITH THREE UNIQUELY DESIGNED LUGS THAT IMPROVE THE FRAME'S TRACKING, STEERING AND LOADING. ITS SHORT CHAINSTAYS POSITION THE RIDER OVER THE REAR WHEEL WHILE SHOCKS SLIP HARMLESSLY UNDER THE SEAT INTO THE TOP TUBE. CAST BB-SHELL EXTENSIONS KEEP THE REAR END TIGHT AND TRACKING TRUE. THE ONE-PIECE TUBE, STRONGER IN THE VERTICAL PLANE, IMPROVES STEERING RESPONSE. THIS ATB IS LIGHT AND TIGHT AND STRONG. EVERY CONSTRUCTION FEATURE TELLS YOU IT WAS BORN TO CLIMB—THE PICTURE DOES NOT. YOU'LL ALMOST NEVER SEE THIS BICYCLE HORIZONTAL.

Shredder

BIG DEAL. TO MAKE SURE, WE DECIDED TO BLOW EVERY OTHER ATB OFF THIS PRICE POINT BY LOADING THE SHREDDER WITH BIG FEATURES IRRESISTIBLE TO BIG FANS OF OFF-ROAD BOMBING. WE STARTED WITH BIG TUBES: OVERSIZE, THIN-WALL STB FOR INCREDIBLE STRENGTH, LIGHTNESS AND STIFFNESS. NEXT A BIG HEADSET (FISHER EVOLUTION*) FOLLOWED BY A BIG STEM AND EXTRA BEARINGS. THE BIG DIFFERENCE IS A BIG IMPROVEMENT IN STABILITY—ESPECIALLY NOTICEABLE WHEN DESCENDING BIG HILLS OR JACKING OVER BIG IRREGULARITIES. THIS BICYCLE IS TRICK! AND YOU CAN AFFORD IT.

Countryrunner

THE COUNTRY RUNNER IS NO COUNTRY BUMPKIN. IT COMES WITH SOME PRETTY SOPHISTICATED COMPONENTS, AND IS AS MUCH AT HOME ON SOUTH 40TH AS IT IS ON THE SOUTH FORTY. ITS AGGRESSIVE GOOD LOOKS ARE FOR GO, NOT FOR SHOW. EXAMPLE—THE HIGH-RADIUS CROWN ROUND-OVAL-ROUND FORK IS DESIGNED TO TAKE ON ROCKS AND ABSORB ROAD SHOCKS. SHIMANO TOTAL INTEGRATION IS AT WORK HERE, FEATURING 300LX WITH SUPER/HYPERGLIDE AND BIOPACE CRANKS. WE'VE THROWN IN A FEW MORE GOODIES LIKE TOE CLIPS, STRAPS AND RITCHEY TIRES TO GIVE YOU ATB COMFORT IN THE COUNTRY AND CONFIDENCE IN THE CITY.

PARK RUNNER IS NOT A CHILD'S BICYCLE. THIS IS A DOWN-SIZE ATB FOR SMALLER RIDERS. THE SHORT, 16-INCH FRAME IS THOUGHTFULLY OUTFITTED WITH A U-BRAKE TO KEEP THE HEELS FROM STRIKING THE CANTILEVER BRAKES. EVERYTHING IS FULL-SIZE SHIMANO COMPONENTRY WITH 21-SPEED RAPID FIRE SHIFTING, SUPERGLIDE AND HYPERGLIDE.

AN ENTRY-LEVEL ATB WORTHY OF THE NAME. WE REFUSED TO STRIP THIS MODEL JUST TO BE MORE PRICE-COMPETITIVE. EVERYTHING ON THIS BICYCLE IS CRITICAL TO ATB BEHAVIOR. ANYTHING LESS IS A DISCOUNT-STORE CLONE THAT LOOKS LIKE A MOUNTAIN BIKE, BUT CAN'T PERFORM LIKE ONE. SPORT RUNNER IS CHROMOLY-TOUGH AND LOADED WITH ATB FEATURES FROM ITS GEOMETRY TO ITS GEARING. YOU MAY BEAT THE PRICE BUT NOT THE VALUE.

Sportrunner

Parkrunner

THIS 20-INCH WHEEL ATB COMES DOWNSIZED, WITH PROPORTIONALLY SMALLER COMPONENTS. THIS IS NOT A BMX BICYCLE, BUT AN AGGRESSIVE 18-GEAR ATB SET UP WITH 6-SPEED INDEXED SHIFTERS AND A TRIPLE CHAINRING. PARK RUNNER IS POTHOLE-PROOF AND CURB-RESISTANT.

Warranty

The Miyata Bicycle Warranty

A. Miyata bicycle frames and front forks are warranted to be free from defect in materials and workmanship under normal use of the bicycle for the lifetime of the bicycle, except in cases specified in Warranty Exclusions.

B. Miyata warranties, for one year from date of sale, all parts except wearing parts (tires, tubes, cables, grips, spokes, bar tapes, brake pads, toe clips, straps, small screws and nuts), frame and fork. This does not include items specified in the Warranty Exclusions.

C. During the warranty period, all parts, as determined by Miyata, found to be defective in workmanship or material will be repaired or replaced free of charge, except for shipping and dealer labor charges (if applicable). This applies to parts, frame and front fork.

D. Return of the Warranty registration card to Miyata is a condition precedent to coverage under this warranty. The warranty registration card must be returned to Miyata to validate warranty.

How to Claim Warranty

A. All claims made under this warranty must be made through an authorized Miyata dealer during the relevant warranty period. To obtain warranty service, the owner must return the defective bicycle to an authorized Miyata dealer for inspection with the sales receipt (or other evidence showing the date of purchase) and the owner record in the owner's handbook or owner's manual.

B. If the original dealer is no longer available or is inconveniently located, the name of the authorized dealer nearest to you can be obtained from Miyata whose address is stated below.

Warranty Exclusions

A. This warranty covers only the original retail purchaser of the bicycle and is not transferable.

B. This warranty does not cover failure due to accident, abuse, misuse, neglect, normal wear and tear, normal paint fading or chrome rust, improper assembly, improper fit, improper maintenance or use of unauthorized replacement parts.

C. This warranty does not cover any personal injuries, damage or failure of bicycle if used in any competitive event, including bicycle racing, bicycle motocross, stunt or similar activities or when used in training for the same. Motors or other accessories inconsistent with the use intended by Miyata will negate this warranty.

D. This warranty is expressly in lieu of any other warranty and any implied warranty of merchantability or fitness for any purpose is limited in duration to the duration of this express warranty. Miyata shall not be responsible for any consequential or incidental damages.

E. Some states do not allow limitation on how long implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you.

F. This warranty does give you specific legal rights, and you also may have other rights which vary from state to state.

G. This warranty does not cover failure due to unlawful acts.

H. Failure to maintain Miyata-requested periodic inspections may invalidate this warranty if such failure can be shown to have contributed to the warranty problem.

I. This warranty is void when the bicycle is used by many and unspecific persons such as rent-a-bicycle businesses.

J. This warranty does not cover failure due to earthquake, lightning, fire, flood, public hazard, and man-made or natural calamity.

K. This warranty does not cover natural phenomena which result from operation of the bicycle, such as vibrations or sounds.

L. This warranty is void when items outlined in the "Owner's Responsibilities" section are not observed.
